

Focus on Customer's Needs, Create Maximum Value for Customers.

Based on the market, LiteMagic concerns on customer's requirements, insists on "customer-oriented" principal. We focus on the products research and development and sustaining innovation. LiteMagic quickly responses to customers' needs, cooperates with customers tightly, and provides comprehensive lighting solution. Meanwhile, we develop customized products to achieve a win-win situation with our customers.

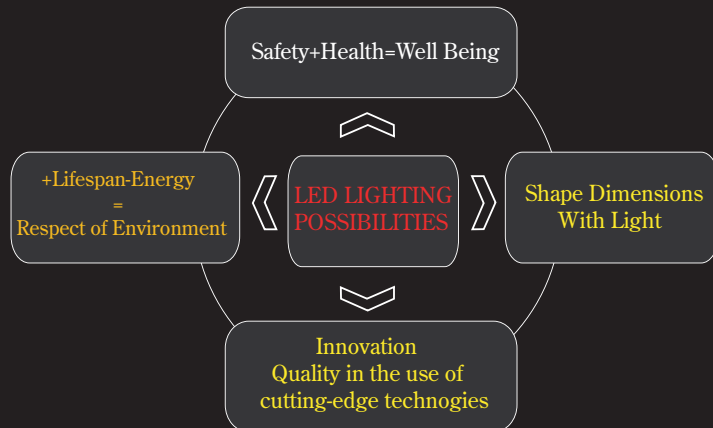

Comprehensive lighting solutions

LiteMagic professional design team has extensive knowledge. Practice makes perfect. We are proud of many featured projects from which we have accumulated rich experience. According to different applications, LiteMagic can provide a series of lighting solutions for buildings, hotels, municipal and theme parks, entertainment centers, enterprises, stadiums and museums, etc. LiteMagic can provide the services as followed:

- The overall layout and design;*
- Lighting effect design;*
- Lighting fixture and controlling system recommendation;*
- Installation and commissioning guidance.*

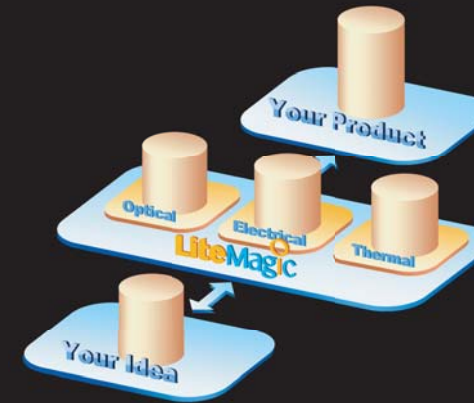

These services not only can meet customer's requirement on long-range control and central control of various lighting sub-systems, but also can realize time-switch, pre-set scenes, audio-visual and lightings synchronization, and real-time effect control, moreover, it can be compatible with the third party controlling protocol and lighting fixtures. LiteMagic is dedicated to providing one-stop service for customer's creation and imagination all the time.

Develop customized products

Relying on LiteMagic's professional design team high level design ability, by mature manufacturing process and quality management, LiteMagic can develop customized products for potential customers, offering optical measurement, simulation and verification of product design feasibility. We provide the service includes:

Product Concept Verification Service

Based on advanced LED technology, LiteMagic solution center can transform products design concept to final products quickly.

Professional Electronic Application Design Service

With good command of MCU, protocol, analog power supply management and other technologies, our skillful electronic application engineer team can provide customers with various suggestions on product development and application.

Optical Assessment, Feature Definition, Design and Simulation Service.

Our optical assessment service can define accurately and assess the existed products in the expanding market, so that our customers can choose proper optical products for their projects.

Provide OEM and ODM service

LiteMagic provides OEM and ODM service for strategic partners, and provides more green and safe products with more reliable function and more competitive price. At present, LiteMagic products are not only suitable for ancient architectural illumination, but also light up the streets all over the world with splendid lighting effect.
